What is HawkHacks?

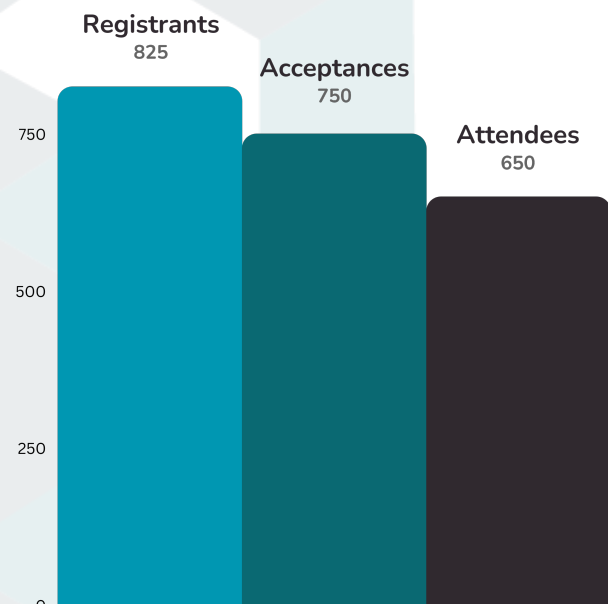

HawkHacks is one of Canada's biggest hackathons, made by and for students. Based at Wilfrid Laurier University, HawkHacks 2024 will be a 36-hour in-person hackathon, hosted overnight from **April 5th - 7th, 2024!**

What did HawkHacks look like last year?

The first edition of HawkHacks back in 2022 was a major success - below you can find information from this edition of the event. You can find [last year's website here](#).

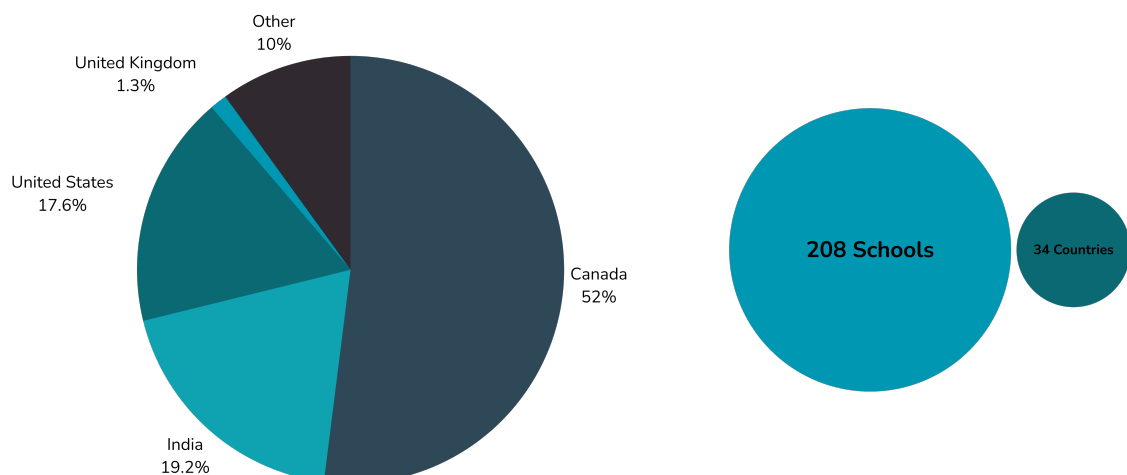

Hackers

We utilized our vast network of related student and non-student organizations to market HawkHacks to a huge audience. This paid off greatly, as we had **825 registrants**, **750 acceptances**, and **650 attendees**.

Demographics

We reached a lot of students from all over the world - we had applicants from **208 unique schools** from **34 unique countries**.

BUT why sponsor HawkHacks?

With all the aforementioned statistics from the first iteration of the hackathon, we hope to be an even bigger success, with a much more interactive and hands-on experience for our sponsors now that the event is in person

Branding & Marketing

HawkHacks is again projected to reach a large student population from within Canada and internationally. Exposing your brand virtually AND in-person to **thousands of potential students**, especially ones from **computing clubs, student organizations**, and **community organizations** will put you center of attention among thousands of potential and current cream-of-the-crop developers.

Recruitment & Platform Testing

Before, during, and after the event, you'll have access to a huge demographic of technically minded individuals, whether that be through **emails, resumes**, or **custom prize categories**. - you get to decide! Through these mediums, you can explore your new and upcoming technologies with students, or have them test your APIs through any form of testing - chaotic, performance, scalability, or whatever else.

Interactivity & Exclusivity

Running HawkHacks in-person allows you a new dimension of interacting with students directly, whether that be through running **in-person and live streamed workshops, giving away swag**, running a **sponsor booth, naming events and rooms**, or even running your own food truck - a personal connection with students ensures students recognize and relate with your brand.

Who else sponsored ya'll in the past?

14 sponsors trusted us in delivering a first-class experience to our attendees during the first iteration of HawkHacks with their support - you can find them listed below.

Extras

Non-monetary sponsorship

If you aren't a company that focuses directly on technology, or believe you can provide more value through non-monetary means, please feel free to let us know - we love food trucks! 🍷

Sponsor an activity/event

Throughout the hackathon, attendees are exposed to a variety of mini-games, social events, and workshops. If you would like to attach yourself to any of these, feel free to mention it to us and we can figure something out!
