What is HawkHacks?

HawkHacks is Wilfrid Laurier University's first Hackathon by and for students interested in computing. HawkHacks will be a 36 hour virtual and in-person hackathon, hosted overnight from **May 13 to 15, 2022!**

Okay... so what makes you special?

HawkHacks intends to deliver a first-class hackathon experience for undergraduate and high school students with sessions being hosted both in person at Laurier's Waterloo campus and online. We intend to bring together students across Ontario from a variety of backgrounds to socialize, learn, and grow together. Alongside this, we want to leverage the virtual nature of the event to bring Laurier to a global audience. We will be hosting workshops with insightful keynote speakers, exciting technologies, and partners in the tech community (hopefully including you!).

Wilfrid Laurier University is a tightly knit community where a lot of great minds reside - the Kitchener-Waterloo region is notorious for this. We want to shine a light on the potential talent and opportunities present at Laurier, as well as empower students and sponsors - the Laurier community is full of keen, like-minded people, especially with Data Science and Computer Science growing exponentially at Laurier, and this Hackathon is a step in unlocking all of that potential.

For a new hackathon, we have a huge network of talent to pool from. Our reach is Canada-wide, with our reach spanning 15 universities and a total of 20K students in the technology, science, and engineering fields. This extensive network is due to our internal and quite personal relationship and partnership with the Computing Councils of Canada, RU Hacks, GuelphHacks, and an assortment of other organisations that we're either a part of, or have worked with before.

Great. Why should we sponsor you?

Branding & Marketing

HawkHacks is projected to reach a large student population from within Canada and globally. Exposing your brand to thousands of potential students from computing clubs, hackathon organizations and community organizations will put you at the center of attention among thousands of potential and current cream-of-the-crop developers.

Recruitment & Platform Testing

Before, during, and after the event, you'll have access to a huge demographic of technically minded individuals, whether that be through emails, workshops, custom prize categories, keynotes, or seminars - you get to decide! Through these mediums, you can explore your new and upcoming technologies with students, or have them test your APIs through any form of testing - chaotic, performance, scalability, or whatever else.

Cool! Where can we see the goods?

	Bronzhawk	Silverhawk	Goldenhawk
General	\$750	\$2,000	\$4,000
